

NOTICE TO MARINERS

Please be advised that Moray Offshore Windfarm (East) Limited (Moray East) will have a survey vessel working in the Moray East wind farm site for approximately two months (46 survey days). The figure and table 1 below provide details of the survey location. The vessel arrived on site on 9 July 2017 and has commenced undertaking geotechnical surveys comprising of sampling boreholes.

The Horizon Geobay will be used to take geotechnical boreholes and samples. This will involve 24h operations over a survey period of approximately 40 days. A break will occur approximately halfway during the geotechnical survey campaign, during which the geophysical survey will take place (see below paragraph); thereafter the geotechnical campaign will resume. Two port calls are anticipated; one before and one after the geophysical survey. Port calls are expected to last 1-2 days.

Geophysical surveys will be undertaken by the same vessel over a period of approximately 6 days, using 24 hour operations. Equipment will be towed from the stern at up to 150 metres in length from the stern of the vessel down to a depth of 10 metres above the seabed. Other equipment will be hull mounted. During the survey the vessel could be stationary for periods of up to one hour.

The first port call is currently anticipated to commence on July 28th, thereafter the geophysical survey will commence. A Fisheries Liaison Officer will be on board the Horizon GeoBay throughout the survey period.

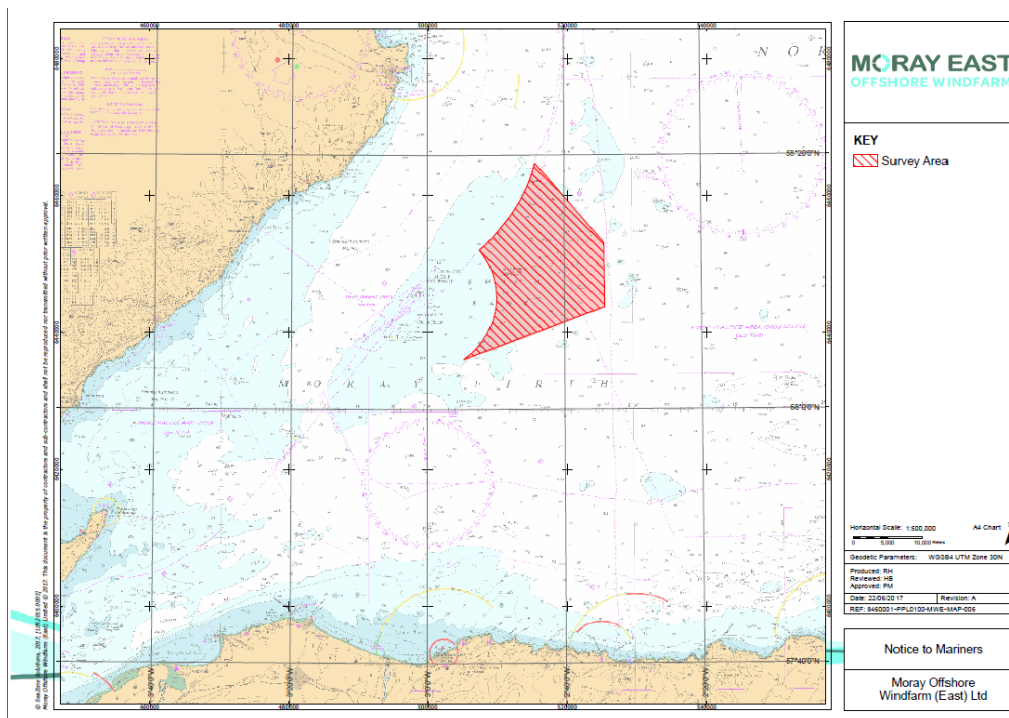

Figure 1: Location of the works

Latitude and longitude for the edge points are as follows:

Point	Latitude	Longitude
1	58° 19' 22.8"	-2° 44' 16.8"
2	58° 13' 8.4"	-2° 34' 15.6"
3	58° 8' 6.0"	-2° 34' 12.0"
4	58° 3' 57.6"	-2° 54' 46.8"
5	58° 12' 36.0"	-2° 52' 26.4"

Key vessel information

Vessel Name	Horizon GeoBay
Operating Company	Horizon Geosciences
Vessel Call Sign	3ETG2
Inmarsat number	435464114
V-Sat number	+85231521336
Vessel mobile phone number	+44 (0)7551328817
Vessel email address	master.geobay@horizon-geosciences.com

Fisheries Liaison Officer contact details

Peter Gatt
